Beaver Creek Reserve

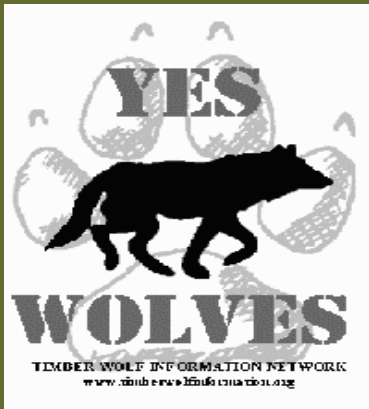

Fall Creek, WI 54742

January 30/31

Treehaven

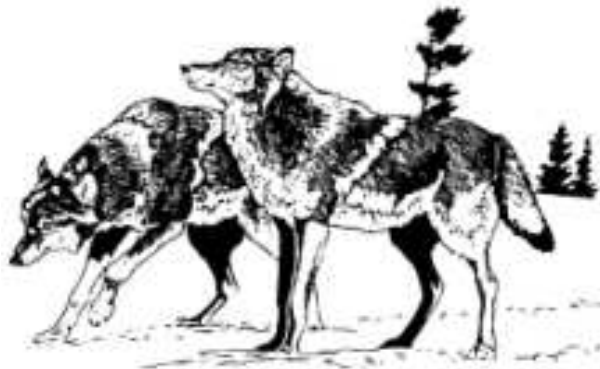

Tomahawk, WI 54487

January 30/31 & February 27/28

Timber Wolf Information Network is a nonprofit organization that was formed in 1989. It is comprised of volunteers from throughout the United States, from all walks of life. The primary goal of the organization is education directed to conservation and management of the timber wolf in the wild. Timber Wolf Information Network accomplishes this goal by offering workshops such as those you see described in this informational brochure. All proceeds go directly to supporting wolf education, monitoring and management.

We hope to meet you soon at one of the workshops offered in 2010.

TWIN's Mission: To increase public awareness and acceptance of the wolf in its natural habitat and its ecological role in the environment.
