

TWIN's Mission:

To increase public awareness and acceptance of the wolf in its natural habitat and its ecological role in the environment.

Timber Wolf Information Network is a nonprofit organization that was formed in 1989. It is comprised of volunteers from throughout the United States, from all walks of life.

The primary goal of the organization is education directed to conservation and management of the timber (gray) wolf in the wild. Timber Wolf Information Network strives to accomplish this goal by offering workshops such as those you see described in this informational brochure. All proceeds go directly to supporting wolf education, monitoring and management.

We hope to meet you at one of our 2017 workshops!

Some comments from workshop attendees...

"I highly appreciate the opportunity to learn from TWIN, it was a magnificent experience!"

"I could have easily sat through another day of information! I have joined your organization due to this course. Your information is great!"

"It was a privilege to get to talk with and listen to people who have been "in the trenches" with the wolves for decades."

"Both instructors were great and the course material was excellent. We hope to attend another one of your seminars because we enjoyed it so much. We also joined TWIN."

"The presenters were awesome and the tracking was informative and fun."

"I will be recommending this to my coworkers and friends. A must do!"

"This was fantastic, it included statistics, videos, history and the instructors were open to conversation and everyone's personal opinions."

"Very thorough and I left feeling all my questions were answered."

"I was happy and glad to make the trip and attend. It was wonderful overall with great, knowledgeable, and enthusiastic instructors, all of them."

2017 Winter Wolf Ecology Workshop

"Moving Beyond Recovery"

Recipient of Honor Award from U.S. Department of the Interior for efforts in support of Wolf Recovery

Winter Wolf Ecology Workshop

TWIN's award-winning Wolf Ecology workshops feature lectures by wolf biologists and other hands-on wolf experts, with many years of experience in the field.

They discuss and demonstrate wolf biology, ethology, and taxonomy, along with detailed analyses of the effects of wolf predation and depredation.

In addition to the ecological study of wolves, TWIN's educators also discuss the human attitudes and actions that have shaped the modern-day management of this iconic animal. They review each state's management strategy and the controversies that continue to surround wolves, and explain the techniques employed in monitoring the elusive canid.

Not only are attendees provided an exceptional classroom experience, TWIN staffers lead them on an actual wolf-tracking field trip - where they explain and demonstrate field survey techniques, discuss the latest wolf ecology research, and explore wolves' use of the winter landscape.

Treehaven

W2540 Pickerel Creek Road, Tomahawk WI 54487
